Mystery Airplane Last Newsletter!

Okay, well it appears that no one figured this one out. Not surprising as there were only about 12 of these made in the 1930's. This is a Wedell-Williams Racer, competed in the Cleveland Air Races with the likes of the Gee Bee and other racers of the time. Very successful in the races as well. The Gilmore racer was also a Wedell Williams Racer.

Big News

As mentioned in the minutes from our most recent club meeting. The owners of the property that we fly off of, have informed us that they will be putting that land up for sale. They have told us that as soon as a price is established they will let us know. Most likely the cost will be too high for our club to

handle. In the meantime the club is open for flying and is in great shape!

We are hopeful that the new owners will be using the land as it has been in the past and perhaps we will be able to work out a lease arrangement with them. Obviously we will not know until later.

In the meantime, we are beginning our search for other possible flying fields for our club. We have already checked out one location that might be available to us through the Greene county parks department. However it is not suitable for our purposes. There is another area that I will be visiting to see how it looks, however it is fairly distant from Springfield.

We are going to be in touch with the Greene county park board and Cities Utilities to see if either of those agencies might be able to assist us and the South Club in securing a location for our activities. I will keep you informed on our progress. In the meantime if any of you know any possible locations please let me know. Ron.

Guys the newsletter is both late and short this month. Sorry will try to keep it more current going forward.

Ron Hargrave
